Keyword index

α and ß adrenoceptors — CRL41405: a drug with a new pharmacological profile on pancreatic exocrine secretion in the rat, 169
acetylcholine release — Further evidence that propentofylline (HWA 285) influences both adenosine receptors and adenosine transport, 99
action potential — Sodium lactate reversal of electrophysiological effects of imipramine in guinea-pig ventricular myocardium, 113
acute heart failure — Role of asynchronous activation of the ventricular fibres by an ectopic pacemaker in the accidents, especially fibrillation, caused by I_c antiarrhythmic drugs, 159
adenosine receptor — Further evidence that propentofylline (HWA 285) influences both adenosine receptors and adenosine transport, 99
adrenoceptor — Renal thromboxane A2 synthesis in the Lyon hypertensive rat, 343
aggregated mice — Dopaminergic transmission and (+)amphetamine-induced lethality in aggregated mice, 21
agranulocytosis — The *in vitro* effect of amodiaquine on bone marrow granulocyte-macrophage progenitor cells from normal subjects, 1
amineptine treatment — Rapid changes in ^{3}H-imipramine platelet binding after chronic treatment with amineptine, a selective dopamine uptake blocker, in major depressed patients, 89
amodiaquine — The *in vitro* effect of amodiaquine on bone marrow granulocyte-macrophage progenitor cells from normal subjects, 1
(+)amphetamine toxicity — Dopaminergic transmission and (+)amphetamine-induced lethality in aggregated mice, 21
angiotensin II — Renal thromboxane A2 synthesis in the Lyon hypertensive rat, 343
α2-antagonists — Is yohimbine-induced increase in salivary secretion a kinin-dependent mechanism ?, 17
antidepressant — Comparative effects of different uptake inhibitor antidepressants in two pain tests in mice, 75
asthma — Could saliva stand for plasma in theophylline monitoring in asthmatic children? Still a controversial problem, 191
atropine — Effects of paraldehyde on the convulsions induced by administration of soman in rats, 309
autonomic nervous control — Effects of quinpirole on autonomic nervous control of heart rate in rats, 67
autoradiography — Further evidence that propentofylline (HWA 285) influences both adenosine receptors and adenosine transport, 99
behavioural toxicity — The effects of acute and repeated doses of suriclone on subjective sleep, psychomotor performance and cognitive function in young and elderly volunteers, 251
bronchitic rats — Effects of S-carboxylmethyl-L-cysteine on pulmonary sialyl transferase activity *in vitro*, in healthy and in sulphur-dioxide-induced bronchitic rats, 29
buspirone — The comparison of the effects of multi and single doses of buspirone, chlordiazepoxide and hydroxyzine on psychomotor function and EEG, 5
caffeine — Caffeine kinetic changes during the oestrous cycle in rats, 45
calcium antagonist — Regulation of human basophil activation. IV. Dissociation between cationic dye binding and histamine release: role of Ca^{2+} ions, 153
calcium channel blocking agent — Lack of effect of isradipine on cyclosporin pharmacokinetics, 367
calcium ion — Regulation of human basophil activation. IV. Dissociation between cationic dye binding and histamine release: role of Ca^{2+} ions, 153
carbocisteine — Study on the effect of oral administration of carbocisteine on ventilatory parameters in the SO_2 inhalation model of bronchitis in the rat, 231
child — Could saliva stand for plasma in theophylline monitoring in asthmatic children? Still a controversial problem, 191
chloral hydrate — Effects of tilting in the anaesthetized and mechanically ventilated rat: a model of orthostatic hypotension, 37
chlordiazepoxide — The comparison of the effects of multi and single doses of buspirone, chlordiazepoxide and hydroxyzine on psychomotor function and EEG, 5
chronic bronchitis — Protection of erdosteine on smoke-induced peripheral neutrophil dysfunction both in

healthy and in bronchitic smokers, 375

cirrhosis — Pharmacokinetics of glafenine and glafenic acid in patients with cirrhosis, compared to healthy volunteers, 197

clinical trial — Quality of life assessment in therapeutic trials: rationale for and presentaiton of a more appropriate instrument, 263 — A French version of the Sickness Impact Profile (SIP): stages in the cross cultural validation of a generic quality of life scale, 319

clomipramine — Compared plasma and brain pharmacokinetics of clomipramine and its metabolite demethylclomipramine in two strains of mice (NMRI and CD1), 49

cognitive function — The effects of acute and repeated doses of suriclone on subjective sleep, psychomotor performance and cognitive function in young and elderly volunteers, 251

colony-forming unit assay — The *in vitro* effect of amodiaquine on bone marrow granulocyte-macrophage progencitor cells from normal subjects, 1

colorimetric assay — *In vitro* stability of the inhibition of serum converting enzyme by fosinopril, 83

CRL41405 — CRL41405: a drug with a new pharmacological profile on pancreatic exocrine secretion in the rat, 169

cromakalim — Differential effects of cromakalim on pancreatic vascular resistance and insulin secretion *in vitro*, 185

cyclic AMP — Further evidence that propentofylline (HWA 285) influences both adenosine receptors and adenosine transport, 99

cyclosporin — Lack of effect of isradipine on cyclosporin pharmacokinetics, 367

D1/D2 dopamine receptor — Dopaminergic transmission and (+)amphetamine-induced lethality in aggregated mice, 21

demethylclomipramine — Compared plasma and brain pharmacokinetics of clomipramine and its metabolite demethylclomipramine in two strains of mice (NMRI and CD1), 49

dog — Comparative effect of truncal vagotomy and pirenzepine on postprandial secretory response of exocrine pancreas in dogs, 59

dopamine untake inhibitor — Dopaminergic transmission and (+)amphetamine-induced lethality in aggregated mice, 21

dopamine uptake — Effects of riluzole (2-amino-6-trifluoromethoxy benzothiazole) on striatal neurochemical markers in the rat, with special reference to the dopamine, choline, GABA and glutamate synaptosomal high affinity uptake systems, 177

dose-effect study — Treatment with growth hormone-releasing hormone (GHRH) 1-44 in children with idiopathic growth hormone deficiency: a randomized double-blind does-effect study, 359

drug monitoring — Could saliva stand for plasma in theophylline monitoring in asthmatic children? Still a controversial problem, 191

eosinophil — Activation of guinea pig eosinophil respiratory burst by leukotrine B_4: role of protein kinase C, 353

flecainide — Role of asynchronous activation of the ventricular fibres by an ectopic pacemaker in the accidents, especially fibrillation, caused by Ic antiarrhythmic drugs, 159

fluorimetric assay — *In vitro* stability of the inhibition of serum converting enzyme by fosinopril, 83

fosinopril — *In vitro* stability of the inhibition of serum converting enzyme by fosinopril, 83

free radical scavenger — Protection of erdosteine on smoke-induced peripheral neutrophil dysfunction both in healthy and in bronchitic smokers, 375

GABA release — K_{ATP} channels modulate GABA release in hippocampal slices in the absence of glucose, 295 — Inhibition of [^{3}H] γ-aminobutyric acid release from guinea-pig hippocampal synaptosomes by serotonergic agents, 333

genetic hypertension — Renal thromboxane A2 synthesis in the Lyon hypertensive rat, 343

GHRH — Treatment with growth hormone-releasing hormone (GHRH) 1-44 in children with idiopathic growth hormone deficiency: a randomized double-blind does-effect study, 359

glafenic acid — Pharmacokinetics of glafenine and glafenic acide in patients with cirrhosis, compared to healthy volunteers, 197

glafenine — Pharmacokinetics of glafenine and glafenic acide in patients with cirrhosis, compared to healthy volunteers, 197

glutamate uptake — Effects of riluzole (2-amino-6-trifluoromethoxy benzothiazole) on striatal neurochemical markers in the rat, with special reference to the dopamine, choline, GABA and glutamate synaptosomal high affinity uptake systems, 177

growth velocity — Treatment with growth hormone-releasing hormone (GHRH) 1-44 in children with idiopathic growth hormone deficiency: a randomized double-blind does-effect study, 359

guinea-pig airway — Rolipram inhibits PAF-induced airway microvascular leakage in guinea-pig: a comparison with milrinone and theophylline, 247

guinea-pig — Inhibition of [^{3}H] γ-aminobutyric acid release from guinea-pig hippocampal synaptosomes by serotonergic agents, 333

guinea-pig isolated trachea — Contractile effect of α,ß-methylene ATP on the guinea-pig isolated trachea, 135

heart rate — Pharmacological analysis of the cardiac effects of 5-HT and some 5-HT receptor agonists in the pithed rat, 237

^{3}H-imipramine binding — Rapid changes in ^{3}H-imipramine platelet binding after chronic treatment with amineptine, a selective dopamine uptake blocker, in major depressed patients, 89

5-HT receptor antagonist — Pharmacological analysis of the cardiac effects of 5-HT and some 5-HT receptor agonists in the pithed rat, 237

5-HT$_3$ receptor — Inhibition of [^{3}H] γ-aminobutyric acid release from guinea-pig hippocampal synaptosomes by serotonergic agents, 333

hippocampus — Inhibition of [^{3}H] γ-aminobutyric acid release from guinea-pig hippocampal synaptosomes by serotonergic agents, 333

histamine release — Regulation of human basophil activation. IV. Dissociation between cationic dye binding and histamine release: role of Ca^{2+} ions, 153

human basophil — Regulation of human basophil activation. IV. Dissociation between cationic dye binding and histamine release: role of Ca^{2+} ions, 153

human saphenous vein — The role of monoamine oxidase in the metabolism of exogenous noradrenaline by the human saphenous vein, 145

hydroxyzine — The comparison of the effects of multi and single doses of buspirone, chlordiazepoxide and hydroxyzine on psychomotor function and EEG, 5

hyperpolarization — Potassium channel openers: pharmacological and clinical aspects, 279

hypoglycemia — K_{ATP} channels modulate GABA release in hippocampal slices in the absence of glucose, 295

ibogaine — Effects of ibogaine on naloxone-precipitated withdrawal in morphine-dependent mice, 327

I$_c$ antiarrhythmic drugs — Role of asynchronous activation of the ventricular fibres by an ectopic pacemaker in the accidents, especially fibrillation, caused by I_c antiarrhythmic drugs, 159

idazoxan stereoisomer — The effects of (±)-idazoxan and its stereoisomers on mouse vas deferens motility *in vitro*. A comparison with yohimbine, 301

imidazoline receptor — The effects of (±)-idazoxan and its stereoisomers on mouse vas deferens motility *in vitro*. A comparison with yohimbine, 301

imipramine — Sodium lactate reversal of electrophysiological effects of imipramine in guinea-pig ventricular myocardium, 113

insulin secretion — Potassium channels of the insulin-secreting B cell, 123 — Differential effects of cromakalim on pancreatic vascular resistance and insulin secretion *in vitro*, 185

intraventricular conduction — Role of asynchronous activation of the ventricular fibres by an ectopic pacemaker in the accidents, especially fibrillation, caused by Ic antiarrhythmic drugs, 159

isradipine — Lack of effect of isradipine on cyclosporin pharmacokinetics, 367

K+ channel opener — Differential effects of cromakalim on pancreatic vascular resistance and insulin secretion *in vitro*, 185 — Potassium channel openers: pharmacological and clinical aspects, 279

kallikrein — Is yohimbine-induced increase in salivary secretion a kinin-dependent mechanism ?, 17

K_{ATP} channel — K_{ATP} channels modulate GABA release in hippocampal slices in the absence of glucose, 295

kinins — Is yohimbine-induced increase in salivary secretion a kinin-dependent mechanism ?, 17

leukotriene B4 — Activation of guinea pig eosinophil respiratory burst by leukotrine B4: role of protein kinase C, 353

major depression — Rapid changes in 3H-imipramine platelet binding after chronic treatment with amineptine, a selective dopamine uptake blocker, in major depressed patients, 89

MAO A and B — The role of monoamine oxidase in the metabolism of exogenous noradrenaline by the human saphenous vein, 145

α,ß-methylene ATP — Contractile effect of α,ß-methylene ATP on the guinea-pig isolated trachea, 135

monoamine — Comparative effects of different uptake inhibitor antidepressants in two pain tests in mice, 75

morphine — Effects of ibogaine on naloxone-precipitated withdrawal in morphine-dependent mice, 327

mouse — Compared plasma and brain pharmacokinetics of clomipramine and its metabolite demethylclomipramine in two strains of mice (NMRI and CD1), 49 — Comparative effects of different uptake inhibitor antidepressants in two pain tests in mice, 75

multi and single dose studies — The comparison of the effects of multi and single doses of buspirone, chlordiazepoxide and hydroxyzine on psychomotor function and EEG, 5

naloxone — Effects of ibogaine on naloxone-precipitated withdrawal in morphine-dependent mice, 327

nociception — Comparative effects of different uptake inhibitor antidepressants in two pain tests in mice, 75

noradrenaline — Effects of tilting in the anaesthetized and mechanically ventilated rat: a model of orthostatic hypotension, 37

noradrenaline metabolism — The role of monoamine oxidase in the metabolism of exogenous noradrenaline by the human saphenous vein, 145

norepinephrine — The effects of (±)-idazoxan and its stereoisomers on mouse vas deferens motility *in vitro*. A comparison with yohimbine, 301

α-NOAA — Effects of ibogaine on naloxone-precipitated withdrawal in morphine-dependent mice, 327

oestrous cycle — Caffeine kinetic changes during the oestrous cycle in rats, 45

opioid withdrawal — Effects of ibogaine on naloxone-precipitated withdrawal in morphine-dependent mice, 327

orthostatic hypotension — Effects of tilting in the anaesthetized and mechanically ventilated rat: a model of orthostatic hypotension, 37

pancreatic B cell — Potassium channels of the insulin-secreting B cell, 123

pancreatic secretion — Comparative effect of truncal vagotomy and pirenzepine on postprandial secretory response of exocrine pancreas in dogs, 59 — CRL41405: a drug with a new pharmacological profile on pancreatic exocrine secretion in the rat, 169

pancreatic vessel — Differential effects of cromakalim on pancreatic vascular resistance and insulin secretion *in vitro*, 185

para-aminoclonidine — The effects of (±)-idazoxan and its stereoisomers on mouse vas deferens motility *in vitro*. A comparison with yohimbine, 301

paracetamol — Tolerance and pharmacokinetics of propacetamol, a paracetamol formulation for intravenous use, 259

paraldehyde — Effects of paraldehyde on the convulsions induced by administration of soman in rats, 309

pentobarbital — Effects of tilting in the anaesthetized and mechanically ventilated rat: a model of orthostatic hypotension, 37

peripheral benzodiazepine receptors — Contractile effect of ,ß-methylene ATP on the guinea-pig isolated trachea, 135

pharmacokinetics — Compared plasma and brain pharmacokinetics of clomipramine and its metabolite demethylclomipramine in two strains of mice (NMRI and CD1), 49 — Pharmacokinetics of vidarabine in the treatment of polyarteritis nodosa, 11 — Caffeine kinetic changes during the oestrous cycle in rats, 45 — Pharmacokinetics of glafenine and glafenic acid in patients with cirrhosis, compared to healthy volunteers, 197 — Tolerance and pharmacokinetics of propacetamol, a paracetamol formulation for intravenous use, 259

pirenzepine — Comparative effect of truncal vagotomy and pirenzepine on postprandial secretory response of exocrine pancreas in dogs, 59

pithed rat — Pharmacological analysis of the cardiac effects of 5-HT and some 5-HT receptor agonists in the pithed rat, 237

PK 26124 — Effects of riluzole (2-amino-6-trifluoromethoxy benzothiazole) on striatal neurochemical markers in the rat, with special reference to the dopamine, choline, GABA and glutamate synaptosomal high affinity uptake systems, 177

plasma exchange — Pharmacokinetics of vidarabine in the treatment of polyarteritis nodosa, 11

platelet — Rapid changes in ^{3}H-imipramine platelet binding after chronic treatment with amineptine, a selective dopamine uptake blocker, in major depressed patients, 89

potassium channels — Potassium channels of the insulin-secreting B cell, 123

presynaptic dopamine receptors — Effects of quinpirole on autonomic nervous control of heart rate in rats, 67

propacetamol HCl — Tolerance and pharmacokinetics of propacetamol, a paracetamol formulation for intravenous use, 259

prostanoids — Renal thromboxane A2 synthesis in the Lyon hypertensive rat, 343

protein kinase C — Activation of guinea pig eosinophil respiratory burst by leukotrine B_4: role of protein kinase C, 353

psychomotor performance — The effects of acute and repeated doses of suriclone on subjective sleep, psychomotor performance and cognitive function in young and elderly volunteers, 251

psychomotor tests and EEG — The comparison of the effects of multi and single doses of buspirone, chlordiazepoxide and hydroxyzine on psychomotor function and EEG, 5

purincergetic receptors — Contractile effect of α,ß-methylene ATP on the guinea-pig isolated trachea, 135

quality of life — Quality of life assessment in therapeutic trials: rationale for and presentation of a more appropriate instrument, 263 — A French version of the Sickness Impact Profile (SIP): stages in the cross cultural validation of a generic quality of life scale, 319

questionnaire — Quality of life assessment in therapeutic trials: rationale for and presentation of a more appropriate instrument, 263

quinpirole — Effects of quinpirole on autonomic nervous control of heart rate in rats, 67

rat — Study on the effect of oral administration of carbocisteine on ventilatory parameters in the SO_2 inhalation model of bronchitis in the rat, 231 — Effects of paraldehyde on the convulsions induced by administration of soman in rats, 309

respiratory burst — Activation of guinea pig eosinophil respiratory burst by leukotrine B_4: role of protein kinase C, 353

riluzole — Effects of riluzole (2-amino-6-trifluoromethoxy benzothiazole) on striatal neurochemical markers in the rat, with special reference to the dopamine, choline, GABA and glutamate synaptosomal high affinity uptake systems, 177

rolipram — Rolipram inhibits PAF-induced airway microvascular leakage in guinea-pig: a comparison with milrinone and theophylline, 247

RP 54274 — Effects of riluzole (2-amino-6-trifluoromethoxy benzothiazole) on striatal neurochemical markers in the rat, with special reference to the dopamine, choline, GABA and glutamate synaptosomal high affinity uptake systems, 177

S-carboxymethyl-L-cysteine — Effects of S-carboxylmethyl-L-cysteine on pulmonary sialyl transferase activity *in vitro*, in healthy and in sulphur-dioxide-induced bronchitic rats, 29

saliva — Is yohimbine-induced increase in salivary secretion a kinin-dependent mechanism ?, 17 — Could saliva stand for plasma in theophylline monitoring in asthmatic children? Still a controversial problem, 191

seizure — Effects of paraldehyde on the convulsions induced by administration of soman in rats, 309

serotonin (5-HT) — Pharmacological analysis of the cardiac effects of 5-HT and some 5-HT receptor agonists in the pithed rat, 237

serum angiotensin enzyme activity — *In vitro* stability of the inhibition of serum converting enzyme by fosinopril, 83

sialyl transferase — Effects of S-carboxylmethyl-L-cysteine on pulmonary sialyl transferase activity *in vitro*, in healthy and in sulphur-dioxide-induced bronchitic rats, 29

Sickness Impact Profile — A French version of the Sickness Impact Profile (SIP): stages in the cross cultural validation of a generic quality of life scale, 319

smooth muscle tone — Potassium channel openers: pharmacological and clinical aspects, 279

SO_2 — Effects of S-carboxylmethyl-L-cysteine on pulmonary sialyl transferase activity *in vitro*, in healthy and in sulphur-dioxide-induced bronchitic rats, 29 — Study on the effect of oral administration of carbocysteine on ventilatory parameters in the SO_2 inhalation model of bronchitis in the rat, 231

sodium lactate — Sodium lactate reversal of electrophysiological effects of imipramine in guinea-pig ventricular myocardium, 113

soman — Effects of paraldehyde on the convulsions induced by administration of soman in rats, 309

specific and non-specific radioimmunoassay — Lack of effect of isradipine on cyclosporin pharmacokinetics, 367

strain — Compared plasma and brain pharmacokinetics of clomipramine and its metabolite demethylclomipramine in two strains of mice (NMRI and CD1), 49

sulphonylurea — K_{ATP} channels modulate GABA release in hippocampal slices in the absence of glucose, 295

suriclone — The effects of acute and repeated doses of suriclone on subjective sleep, psychomotor performance and cognitive function in young and elderly volunteers, 251

sympathetic control — Effects of quinpirole on autonomic nervous control of heart rate in rats, 67

synaptosome — Inhibition of [^{3}H] γ-aminobutyric acid release from guinea-pig hippocampal synaptosomes by serotonergic agents, 333

theophylline — Could saliva stand for plasma in theophylline monitoring in asthmatic children? Still a controversial problem, 191

thiol derivative — Protection of erdosteine on smoke-induced peripheral neutrophil dysfunction both in healthy and in bronchitic smokers, 375

thromboxane A2 — Renal thromboxane A2 synthesis in the Lyon hypertensive rat, 343

toluidine blue — Regulation of human basophil activation. IV. Dissociation between cationic dye binding and histamine release: role of Ca^{2+} ions, 153

truncal vagotomy — Comparative effect of truncal vagotomy and pirenzepine on postprandial secretory response of exocrine pancreas in dogs, 59

tyramine — Effects of tilting in the anaesthetized and mechanically ventilated rat: a model of orthostatic hypotension, 37

U-75302 — Activation of guinea pig eosinophil respiratory burst by leukotrine B_4: role of protein kinase C, 353

vascular permeability — Rolipram inhibits PAF-induced airway microvascular leakage in guinea-pig: a comparison with milrinone and theophylline, 247

ventilatory parameter — Study on the effect of oral administration of carbocisteine on ventilatory parameters in the SO_2 inhalation model of bronchitis in the rat, 231

ventricular fibrillation — Role of asynchronous activation of the ventricular fibres by an ectopic pacemaker in the accidents, especially fibrillation, caused by I_c antiarrhythmic drugs, 159

ventricular myocardium — Sodium lactate reversal of electrophysiological effects of imipramine in guinea-pig ventricular myocardium, 113

vidarabine — Pharmacokinetics of vidarabine in the treatment of polyarteritis nodosa, 11

xanthines adenosine transport — Further evidence that propentofylline (HWA 285) influences both adenosine receptors and adenosine transport, 99

yohimbine — Is yohimbine-induced increase in salivary secretion a kinin-dependent mechanism?, 17 — The effects of (±)-idazoxan and its stereoisomers on mouse vas deferens motility *in vitro*. A comparison with yohimbine, 301
